TILE AND GROUT CLEANER

- ✓ OIL & GREASE EMULSIFIER
- ✓ NON CORROSIVE
- ✓ NON CAUSTIC
- ✓ FREE RINSING

pH 8.5 when mixed 1:10

BDTile & Grout is a powerful oil & grease emulsifier that produces exceptional results on all stone and ceramic finishes including bench tops, floor tile, grout, terrazzo Etc. It is mildly alkaline so it will not decalcify lime, grout or marble finishes. It is non-corrosive and will not damage metal edge strips and mouldings and is safe to use in both metal and plastic cleaning equipment. It's non odour, non solvent formulation makes it ideal for use in kitchens and all food processing areas.

It will emulsify animal & vegetable fats and is particularly effective on the stubborn grease/starch/protein mixture that can build up on kitchen tile & grout.

It can be used in areas occupied by chemical sensitive individuals.

PREPARATION

1. Remove furniture and other items from the area being cleaned
2. Remove surface litter and thoroughly vacuum or sweep area to be cleaned
3. Floor may be prewashed to remove superficial soil
4. Ideally **Tile and Grout Cleaner** should be applied to dry floor for maximum soil penetration

DIRECTIONS

Benchtops, lightly soiled floors

1. Apply **Tile and Grout Cleaner** as a prespray at a dilution of 1:40
2. Clean and rinse by your preferred method

Heavy soil and grout treatment

1. Apply **Tile and Grout Cleaner** as a prespray at a dilution of up to 1:10
2. Allow dwell time 5 – 10 mins for emulsification
3. Machine using your rotary tile cleaner as per manufacturers instructions

FOR SUPERIOR RESULTS

Tile and Grout Cleaner leaves no residue so following drying no further cleaning is required. However it may be beneficial to luster or dress the floor by light buffing with a low speed machine and a white pad. This will enhance the eye appeal of the finish especially on polished porcelain tile, granite & glazed finishes.

FIRST AID PROCEDURE

If swallowed, do not induce vomiting. Give a glass of water and seek medical attention. If in eyes, hold eyelids apart and flush continuously with running water for 15 minutes. Seek medical attention if any irritation persists.
