ENCAP SPOT & STAIN REMOVER

- ✓ **MULTI PURPOSE**
- ✓ **CARPET & UPHOLSTER, SPOT CLEANING**
- ✓ **SOIL REPELLENT**

Encap Spot & Stain Remover is a highly effective cleaner and soil suspender for all carpet and upholstery spot cleaning applications. It uses encapsulant technology making it the ideal adjunct to encapsulation cleaning where a spot cleaner or booster is required. The encapsulation properties also assist in reducing or eliminating soil residues following spot cleaning and eliminating ring marks or re-emergence. Any residue remaining is completely removed by vacuuming following drying. The added fluoro protectors impart soil resistance to the treated area.

No liability is accepted for loss or damage caused by the use of this product. Users should pre-test to ensure that the product is suitable for their intended purpose.

DIRECTIONS

For individual spots or spills: Remove any bulk soil or liquid by blotting or scraping from the surface. If dry, thoroughly vacuum the area. Spray the soiled area lightly with Encap Spot & Stain Remover. Agitate gently and absorb with a clean absorbent cloth. Continue to absorb until area is near dry in order to minimize residues.

Encap Spot & Stain Remover may also be used to assist in removing stubborn spots and stains encountered while shampooing. Spray the problem area and work in with your shampoo or encapsulant cleaning tool.

FOR BEST RESULTS

After blotting the residues place a weighted pad of clean absorbent cloth over the cleaned area. Ideally this would be left in place until dry, or overnight for a superior result. Vacuum the area thoroughly after it has completely dried. Areas that are to be returned to service immediately should be speed dried.

FIRST AID PROCEDURE

If swallowed, do not induce vomiting. Give a glass of water and seek medical attention. If in eyes, hold eyelids apart and flush continuously with running water for 15 minutes. Seek medical attention if any adverse symptoms persist.
