ENCAP BONNET CLEANER

- ✓ **PROTECTOR**
- ✓ **COMMERCIAL & DOMESTIC USE**
- ✓ **ENCAP TECHNOLOGY**

Encap Bonnet Cleaner is an encapsulating polymer shampoo. As the name suggests, it encapsulates or traps soil in suspension so that it dries to a powder that will not readily adhere to carpet or upholstery fibre. It is a low pH formulation and safe on all wool and 5th and 6th generation fibres. It is compatible with all rotary bonnet cleaning machines. Encap Bonnet Cleaner is designed to be part of a maintenance cleaning program. It is ideal for commercial and domestic use and has a low environmental impact and minimal living disturbance. Regular vacuum cleaning is an essential part of the Encap Bonnet Cleaner program.

Manufactured in Australia, exclusively for Bennett Direct

No liability is accepted for loss or damage caused by the use of this product. Users should pre-test to ensure that the product is suitable for their intended purpose.

PREPARATION

Thoroughly vacuum the area to remove all dry soil prior to wet application.

DIRECTIONS

Make up a lukewarm solution of Bennett Direct Encap Bonnet Cleaner as follows:

Strong solution: 1:4 (1 litre ENCAP + 4 litres water)

Medium solution: 1:6 (1 litre ENCAP + 6 litres water)

Mild solution: 1:8 (1 litre ENCAP + 8 litres water)

It is not necessary to use solutions stronger than 1:4. This dilution rate will give the shortest drying time. The preferred dilution rate will vary depending on your application equipment, carpet construction and soil.

Apply by prespray directly onto the carpet and/or by wetting the cleaning pads in a bucket of made up solution. Follow the operating instructions for your bonnet cleaning system.

Following Encap Bonnet Cleaner, normal maintenance vacuuming will continue to remove encapsulated soil and improve carpet appearance.

Optional:

A 24 hour follow up call can be incorporated in your service to professionally vacuum the carpet and remove dry encapsulated soil. Any emergent spots can be treated at this stage using Encap Spot & Stain Remover.

FIRST AID PROCEDURE

If swallowed, do not induce vomiting. Give a glass of water and seek medical attention. If in eyes, hold eyelids apart and flush continuously with running water for 15 minutes. Seek medical attention if any adverse symptoms persist.
