

## FABRICLEAN

- ✓ **BROAD SPECTRUM**
- ✓ **NEUTRAL CLEANER**
- ✓ **ALL SYNTHETIC & NATURAL FIBRES**

Bennett Direct **Fabriclean** Upholstery Soil Conditioner is specially formulated to be effective in removing soils from the wider range of fibres and fabrics used in upholstery and drapery. It can be used on natural and synthetic fibres.

### PREPARATION

Thoroughly pre-vacuum the upholstery piece using multiple passes to draw fine particulate soil through the upholstery fabric. Use a crevice tool to remove any lint build up in seams.

### DIRECTIONS

Prepare a cleaning solution using one part Bennett Direct **Fabriclean** to 25 parts water. Apply as a light prespray. Gently brush the prespray into the fabric using a soft upholstery brush. Extract using hot water.

For drapes, follow a similar procedure, using a suitable shrouded drape cleaning tool.

**IMPORTANT:** Both the prespray solution and the hot water extraction must be tested in an inconspicuous place for dye stability.

### FOR BEST RESULTS

For multicolour printed fabrics and Jacquard weaves, apply Bennett Direct **Acid Rinse** as an acid dye stabilizer before applying prespray.

Where heavy food soil has impacted the fabric apply Bennett Direct **ZYMES** Protein Digester and work into the fabric with a brush.

Accelerate drying and reduce any possibility of dye migration by using an airmover to speed dry each piece as you continue to clean.

### FIRST AID PROCEDURE

If swallowed, do not induce vomiting. Give a glass of water and seek medical attention. If in eyes, hold eyelids apart and flush continuously with running water for 15 minutes. Seek medical attention if any adverse symptoms persist.
